CGCT MODEL 1 — COLLABORATION WORKFLOW (CONTENT DEVELOPMENT)

1. Topic mapping — the RP maps each tutorial set to the course syllabus (Chapters 1–7) and the Course Outcomes (CO1–CO3).

2. Content development — the RP develops the question sets, worked solutions and answer explanations in the MEQ545 All-Quiz Tutorial Portal; the teaching team reviews and contributes items (sets T1–T4).

3. Industry co-development — the Industry Panel co-develops and validates the industry-context scenarios for sets T5–T8: cost estimation, time value of money, project evaluation and comparison of alternatives (feasibility, cost optimisation, operation & maintenance decisions).

4. Team extension — the teaching team extends the industry-co-developed framework into additional sets T9–T10.

5. Deployment & monitoring — sets are released in the portal according to the schedule above; submissions, scores and attendance e-signatures are monitored via the portal admin dashboard.
